# MILLWORK

## "The Important Part of a House"

Of all the materials which go into a house, Millwork is one of the most conspicuous. We endeavor to furnish first class millwork, but it requires proper care in installing by the carpenter, plus a good job of finishing by the painter, in order to enhance the value and joy of living with it in any home.

### CARE OF WOODWORK

Wood has been proven a very satisfactory building material when properly treated. Finish lumber, mouldings, doors and other items of kiln dried wood should not be taken into a house until the plaster is thoroughly dry. Dry lumber absorbs the moisture in the air readily which makes it very necessary to prime or oil all wood products as soon as delivered. This stops the raising of the grain and swelling.

Exterior Doors should be painted or varnished on both faces and all edges, the bottom edge being the most important for the end grain of unpainted wood acts the same as a sponge. Water can be drawn up several inches and this is what causes warping or loosening of the joints.

### How to Order

A Millwork Order Blank is enclosed with this catalog and by filling in properly we should be able to fill your order correctly. Be sure to give the names or numbers shown in the catalog along with the size, thickness, and quantity required.

The universal rule in ordering Millwork is: Give the **width first**, then the **height**, then the **thickness**.

### Frames

Please check the details shown in the frame section to see if the wall construction is the same as yours. If different than Standard, be sure to give the total wall thickness or specify the size of the members you are using such as shiplap and studs; also if lath and plaster or wallboard is to be used inside.

Sash frames should be specified as to their operation, swing out, swing in, or stationery.

### Windows and Sash

The term Sash indicates a single piece, that is the glass with the wood rim around it. A window means two pieces, a lower and upper sash. In ordering windows give the glass size of the lower and upper sash. In ordering sash give the size of the frame opening to be filled, preceded by the abbreviation O.S.M., meaning outside measure.

If the single large light in either sash or window is to be divided into smaller lights, be sure to specify the number or send a sketch showing the arrangement of lights.

### Doors

In ordering doors not shown in the catalog it is advisable to send a sketch showing arrangement of panels, size of glass, etc., as well as the size and thickness.

### Made to Order Goods

We are prepared to furnish special millwork of all kinds. Remember, however, that you can save time and money by ordering the stock items shown in this catalog. Odd sizes and special millwork must be made to order and will take from two to three weeks' time. If your order contains both stock items and made-to-order items, please state if you want the stock items sent at once or whether the entire order shall be held, awaiting the making of special items.

### Shipping Point

Be sure to specify shipping point and if different than postoffice give both.

### Freight

All prices in this catalog are F.O.B. Seattle. We will be glad to quote delivered prices to your station on any lists of material that you send us.

### Damage in Shipment

Always inspect your goods carefully before taking them from the station. If any bundles are missing or are broken or scratched, have the agent make a notation on the freight bill of the damaged or missing article. If you will then send us the freight bill, we will pay the damage or replace the goods.

### Terms

**Cash in Full with Order:** If you care to send cash in full with the order, we will allow a cash discount of 2%. Take this off when sending order.

**Cash on Delivery:** If you do not care to send all cash with the order, we will ship it on receipt of 25% of the amount of the bill. In this case we draw a draft for the balance with Bill of Lading attached and send it to your bank.

**Prepay Stations:** If your station is a prepay station, it will be necessary to send enough money with the order to pay for the material and also the freight. We will refund any excess sent.

# Philippine Mahogany Doors

## ENTRANCE DOORS OF DISTINCTION

### Natural Wood Finishes

#### *The Latest Style in Modern Homes*

The Flush Type doors shown on this page are made from Philippine Mahogany, a beautiful light colored wood with unusual ribbon like grain. Its lightness makes it possible to stain almost any color desired, from the natural light finish to the dark Walnut or red brown Mahogany.

### FAIR

A practical door for the Modern Home, "V" grooves forming a pleasing design, and a hinged wicket sash glazed with Reeded Translucent glass. The light effect through this new glass is very interesting.

Size of Door	Philippine Mahogany Per Door	Vertical Grain Fir Per Door
3'0"x6'8" 1 3/4"	\$27.05	\$25.55
3'0"x7'0" 1 3/4"	28.02	26.45
3'6"x7'0" 1 3/4"	31.44	29.60

### OLYMPIC

Simplicity of design makes this door suitable for many types of houses. The metal wicket has a hinged door on the inside glazed with clear glass. Prices as quoted are for a Brass Finished Wicket. If Old Iron Finish wanted, please specify.

Size of Door	Philippine Mahogany Per Door	Vertical Grain Fir Per Door
3'0"x6'8" 1 3/4"	\$26.37	\$24.67
3'0"x7'0" 1 3/4"	27.35	25.77
3'6"x7'0" 1 3/4"	31.26	28.92

### MODERN

This is a typically modern Front Door. It has an Old Iron Finish Metal Wicket with a Knocker and on the inside a smaller metal door that can be opened. On the outside are four "V" Grooves. Made either in Ribbon Figured Philippine Mahogany or Vertical Grain Fir.

Size of Door	Philippine Mahogany Per Door	Vertical Grain Fir Per Door
3'0"x6'8" 1 3/4"	\$25.76	\$24.26
3'0"x7'0" 1 3/4"	26.73	25.16
3'6"x7'0" 1 3/4"	30.14	28.31

### NAPLES

#### PHILIPPINE MAHOGANY FLUSH DOOR

The outside of this door has two Fancy Moulded Grooves about one inch wide. The light is covered with a Metal Grille, finish Old Iron. Back of this Grille is a wood sash that can be opened.

Size of Door	Philippine Mahogany Per Door	Vertical Grain Fir Per Door
3'0"x6'8" 1 3/4"	\$26.51	\$25.01
3'0"x7'0" 1 3/4"	27.48	25.91

# Garage Doors and Garage Door Hardware

A light weight door strengthened with steel so that it will not sag. Any carpenter can install the door in a few hours after the jamb is set. Plain S4S Jambs required with net opening 8'0"x7'0", with a flat 2x4 on the inside on which the steel weatherstrip is attached. Please write for additional information and details.

No. 38

**Craw-Fir-Dor**  
SELF ENFRIGLIZING-ONE PIECE-UPWARD ACTING

A simple overhead type garage door made in one standard size at an economical price.

Plywood Panels are Rezite-coated for protection. Hardware shipped complete in separate carton including all screws, bolts, etc. A keyed lock opens the door from the outside and a handle from the inside. Lock with extension rod holds the door at both sides.

All Doors for 8'-0"x7'-0" Opening  
Complete with Hardware and Keyed Lock

No. 38	8 Panels	\$28.00
No. 39	Panels and glass	32.50
No. 40	16 Panels	31.00
Frame K.D.		\$3.60

The "Craw-Fir-Dor" requires only 2" head room, and 2" on each side inside the garage. The garage does not need to be any longer than your car. Due to the perfect mechanical balance the door operates so easily that a child can open it.

No. 39

W721—Wood Bars

## SASH BALANCES

We carry in stock two types of spring Sash Balances. See Page 48 for information. Sash Stiles grooved for Grand Rapids Sash Balance add per window \$0.40.

## PREFIT WINDOWS

We can furnish any of the windows listed on these pages prefitted to exact size and the bottom rails beveled for \$0.40 per window. This saves considerable carpenter labor and insures better operating windows due to this being done by machines.

If we furnish the frames we size the windows to net size as specified in "Size of Opening." Our frames are made oversize in width to allow the necessary clearance. No deviations will be made from these sizes unless ordered otherwise.

## SASH WEIGHTS

Sizes from 3 to 9 1/2 pounds by half pounds and from 10 to 25 pounds by pounds. If ordered with windows we will weigh the windows and send the correct size.

Per Pound ..... .03 1/2

## SASH CORD

Solid Braided Cotton put up in bundles of 100 feet. One bundle will hang five average size windows.

Per Hank  
No. 7 ..... \$1.00  
No. 8 ..... 1.25

## STORM SASH FASTENERS AND ADJUSTERS

Two in a set. Per set.....\$0.35

### DIRECTIONS FOR ORDERING STORM SASH

In ordering give us the size of the glass, if the top and bottom are different, the size of each; the number of lights in the sash or window they are to protect, and also the outside measure of the storm sash. If there is any doubt, draw a sketch.

Remember to always give the width first, then the height.

For Ventslots in Bottom Rail add \$0.10.

For Rabbeting 1 1/16" Storm Sash to fit 3/4" Casing add \$0.30.

For twin units figure two singles. For rough opening double window opening and add 4".

For triple units figure three singles. For rough opening, three times window opening and add 5½".

### SPECIFICATIONS

**FRAME**—Standard either No. 400 or No. 402 of Old Growth Fir semi-assembled. Jambs resin sealed, and not to be painted.

**SASH**—Made of V. G. Fir, sized to exact size with bottom rail beveled and side stiles grooved for sash balances. Glazed with SS "B" glass.

**BALANCES**—Grand Rapids Invisible Spring Balance, fitted to groove in sash. Two screws to insert on the job. Balances adjustable with a screw driver to obtain perfect balance of the sash. See page 48 for details.

**INTERIOR TRIM**—Complete trim for the opening consisting of any 2½" casing shown on page 32, stool, stops and apron. Stops have fixed position on frame to give proper allowance for easy operation of the sash.

**WEATHERSTRIPS**—The simplest form of weatherstrip known is used. A continuous spring strip of special alloy white metal attached to blind stop and parting bead assures correct tightness of either sash in any position. Spring type strips at sill, check rail and head, forms a complete job, which by actual tests is as efficient as many more expensive types.

# Screened Casement Sash

## "Slideway"

### Screened Sash

Patented December Eleventh, 1934, No. 1983846

### Can You Have Swing Out Casement Sash With Screens that are Convenient?

The "Slideway" Screened Casement solves this old problem with the utmost simplicity.

**Operation**—The Screen equipped with ball-bearing rollers slides on a metal track into a pocket in the wall. The sash can be opened at any angle and the Screen pulled across the opening with one finger. When used with Venetian Blinds, the Screen may be opened or closed by raising the Blinds only a few inches.

It is so easily operated that there is practically no wear on any part, making it last the lifetime of the house. If the Bronze screen wire should be damaged it can easily be replaced by removing one stop.

**Other Sizes and Designs**—The sizes are standard, but other sizes and sash designs or triples can be furnished. Twins or Triples can be fitted with either one or both outside sash screened. Philippine Mahogany trim will be furnished at a slightly higher price.

**Storm Sash Combination, Extra**—For cold climates or for use with complete air-conditioned houses we can furnish a combination Screen and Storm Sash which is interchangeable in the Sliding Section. Imagine the convenience of replacing the Screen with a Storm Sash in the Fall and having the efficiency of double glass insulation, along with the ability to open your sash at will, on the warmer days of winter. Prices quoted on this combination at your request.

#### FRAMING SPECIFICATIONS

To frame rough opening for Slideway Screened Casements Width

**For Single Sash:** A—Width of sash plus three inches. B—Width of sash.

**For Twin Sash, With One Screen:** A—Combined width of two sash plus four inches. B—Width of one sash.

**For Twin Sash, With Two Screens:** A—Combined width of two sash plus four inches. B—Width of one sash, on each of A.

**Height**—Height of sash plus four inches.

Other Sizes and Designs, Made to Order

Above detail shows a Right Hand Screen standing inside looking out. Be sure to specify Left Hand Screen in the same manner.

#### CONSTRUCTION AND INSTALLATION

This unit is set up complete ready to install. The frame is made with a split jamb, fitted with screws so that a Twin or Triple may be installed after the flat cripple (see detail) is in place and the sheathing is applied. The sash are fitted to the frames and prepared for Casement Hardware. (This Hardware is not included in the prices quoted.)

#### CASEMENT SASH HARDWARE

This Hardware not only takes the place of hinges and adjusters, but it allows the cleaning of outside of glass from the inside.

10" long for sash up to 30" wide.

Wrought Steel, Sheridized Finish.

Per Set (For One Sash).....\$0.65

Corner Frames shown above are Knock Down with No. 1066 Siding or Brick Mould same as No. 402 Frame, page 28. They can be furnished like No. 400 or No. 406. Please specify when ordering.

To obtain a price on this same style of corner window of different sizes, use price of 2 windows, W-718, page 17, and two frames, page 28, plus \$1.50 per corner. Other sizes and designs, or twins and triples, can be furnished. If frames set up add per corner unit \$2.00.

If a narrow sash or window is wanted on one side of the corner and a larger one or twin wanted on the other, be sure to specify the position according to R. & L. as shown on these details. Positions are from the inside of building looking toward the outside.

To obtain a price on this same style of corner sash of different sizes, use price of two sash, page 20, and two frames, page 29, plus \$1.50 per corner. Other sizes and designs, or twins and triples, can be furnished. If frames set up add per corner unit \$2.00.

# Exterior Window Frames

FOR FRAME BUILDING WITH 2x4 STUDDING

Jambs Including Blind Stop, 5 3/16 Inches Wide

Made of soft yellow fir, accurately machined and shipped in one bundle ready to assemble. All window frames are made with removable pockets and jamb-proof pulleys. The sills have a steeper pitch than usual with a shoulder to keep wind and rain from driving under stool and another for storm sash or screen to set against. Sills are dadoed to receive pulley stiles and when frames are sent out set up white lead is used in all joints.

Note: All frames have 5 3/16" jambs. For special width jambs see extras on opposite page.

## FRAMES WITH SASH BALANCES

If sash balances are to be used in place of pulleys, weights and cord, BE SURE TO MAKE LESS ALLOWANCE for ROUGH OPENINGS. Allow 3" in width and 4" in height over outside measure of window. Add 2" for each mullion jamb.

It is IMPORTANT that we know if you intend to use balances. The type of balance used determines the cost of installation.

If Acme Twin Balances are used as shown on page 48 add the price of the balances plus \$0.25 to the regular price of a window frame.

## TO DETERMINE ROUGH OPENING REQUIRED

Width—Single windows add 6 inches to the width of window. (From outside measure.)

Twin windows, take the combined width of two windows and add 11 1/2 inches.

Triple windows, take the combined width of three windows and add 17 inches.

Height—Add 4 inches to height of window.

# Exterior Sash and Door Frames

For Frame Building with 2x4 Studding  
Jambs 5 3/16 Inches Wide

Made of soft yellow fir, accurately machined and shipped in one bundle ready to assemble. Sash frames, unless otherwise ordered, are made for swing out sash, but they can be furnished for stationary or swing in sash at no extra cost. The jambs are double rabbeted with a stop on the inside for the sash to set against. If hardwood is used for interior trim this stop can be furnished to match the other trim. The sill has a steeper pitch than usual and has a shoulder to keep wind and rain from driving under stool. Frames can also be made to special details. Write for prices.

# Door and Window Trim Sets

CLEAR YELLOW FIR OR PHILIPPINE MAHOGANY

Cut to Length and Bundled

## TRIM SETS

Complete Door and Window Trim  
Cut to Length and Bundled

Window and Door Trim Sets consist of all the material necessary to trim one side of a door or window. Each member is cut to approximate length, one inch being allowed for trimming, and is stamped on the back Window Side, Window Head, Door Side, or Door Head and like members bundled. With these members so marked it is a simple matter to locate where they go, at a considerable saving of time and with no waste.

At an additional charge of \$.10 per set we will assemble in one bundle all members necessary to trim an opening.

For paper wrapping add \$.20 per set.

Window Trim Sets consist of two side Casings and one head Casing of pattern selected, two side and one head Stop No. 1235, Stool No. 1315, and Apron to match Casing.

Door Trim Sets consist of two side Casings and one head Casing of pattern selected. No Stops furnished with Door Sets.

For Stops and Stools wider than above there will be an additional charge.

Trim for twin window double price of single.

Trim for triple window triple price of single.

Be sure to specify Number and Pattern of Casing wanted.

See Pages 31 and 32 for Patterns.

INSIDE DOOR FRAMES

# Ribbon Grain Philippine Mahogany Trim

Let us give you a quotation on Philippine Mahogany doors and trim for the main rooms of your house. The slight additional cost will surprise you.

Philippine Mahogany, which is not only beautiful and distinctive, but also low in original cost and upkeep, is filling a long felt need for woodwork in the home. A good finish on this wood will last for years with occasional cleaning and polishing. Con-

sidering this quality, the difference in cost between painted woodwork and Philippine Mahogany is very little.

The soft ribbon figure grain with its ever changing shadows due to changes in direction of light, makes it a distinctive wood which has unusual life and character. We are prepared to make any item of millwork which you may need out of this wood.

Turn to the first four pages of this book for designs and prices of Philippine Mahogany doors to go with this trim.

See Page 37 for  
Philippine Plywood

## PRICE LIST PER 100 LINEAL FEET Flat and Moulded Surfaces Sanded

We quote below prices on all patterns of Philippine Mahogany Mouldings and Trim that we carry in stock. Most patterns are shown on pages 32 to 35. For other patterns write for circular "Modern Mouldings," showing both Fir and Philippine Mahogany.

## HARDWOOD FLOORING

### First Grade

Clear White or Red Oak—Plain or Quartered

### Second Grade

Select White or Red Oak—Plain

### Third Grade

Common White or Red Oak—Plain

Eastern Maple in First, Second and Third Grades carried in 1 1/2 x 2 1/4 and 3/4 x 2 T&G.

In ordering 1 1/2 x 2 1/4 add 1/3 to square footage of room, and for 3/4 x 2 1/4 add 1/4.

## Tennessee Cedar Closet Lining

For use in old or new houses. This is the same lumber that is used in making cedar chests for protection against moths. It is tongue and grooved, and end matched and can be easily blind nailed over old plaster walls. The net size is 3/8" x 2 1/2", and it comes in a paper carton containing fifty feet, enough to cover forty square feet of wall surface.

Per Carton of Fifty Feet.....\$7.00

## Tempered Hard Board

An extremely dense board to be used where strength and wearing qualities are wanted: Counter tops, Booths, etc.

Size of Sheets	1/8"	Per M Feet 3/16"	1/4"
4'x6'-12'	\$80.00	\$95.00	\$130.00
4'x8'-9'-10'	83.00	100.00	

## TEMPERED TILE

For bathrooms and kitchens, marked in tiles 4"x4" square. Never chips, cracks, warps or buckles.

Size of Sheets	Per M Feet 1/8"	3/16"
4'x8'-10'-12'	\$110.00	\$130.00

For Hard Board, Tempered Hardboard or Tempered Tile cut to size use next larger 6"; for smaller dimension, next larger foot for larger dimension, and add to above prices 25%.

## Sash Balances

### GRAND RAPIDS INVISIBLE BALANCE

For Double Hung Windows so that narrow casings and narrow mullions may be used without trouble

The two outstanding features of this new spring window balance are that it is not visible after installation, and that each pair of balances has an adjustment of from 2 to 6 pounds, depending on the size used.

Each balance is installed in a groove in the sash stile and then attached to the jamb of the frame with one screw. No preparation of the frame is necessary.

#### ORDERING:

When ordering balances specify the glass size of top and bottom sash and the kind of glass, either single or double strength.

#### GROOVING SASH:

If we do not furnish the sash be sure to have them grooved on each stile  $\frac{5}{8}$ " wide and  $\frac{1}{8}$ " deep.

#### PRICES PER SET OF 4 BALANCES

12" to 30" high up to 48" wide.....	\$2.05
32" to 38" high up to 48" wide.....	2.35
34" to 40" high up to 54" wide.....	3.20
42" to 48" high up to 54" wide.....	3.95

Figure 1

Figure 2

Figure 3

Figure 4

### ACME-TWIN

### ACME TWIN BALANCE

Long-lived spring in rustproof case, with tested cable, also rust-proofed.

One balance is used on one side of sash only, for sash up to 36" wide. Sizes wider require two balances per window.

Balances are self-adjusting to within a limit of two pounds. Maximum weight should always be given. In ordering give the glass size of each sash, thickness of sash, and type of glass used. If in doubt weigh the sash.

Prices per each Balance for a single Double Hung Window when used on one side only.

#### NUMBER CORRESPONDS TO THE WEIGHT OF EACH SASH

For 2 Equal Lights		For Shorter Top Lights	
No. 4 1/2 .....	\$1.35	No. 6 and 8 .....	\$1.35
No. 6 .....	1.35	No. 8 and 12 .....	1.35
No. 8 .....	1.35	No. 10 and 12 .....	1.35
No. 10 .....	1.35	No. 10 and 14 .....	1.50
No. 12 .....	1.35	No. 10 and 16 .....	1.65
No. 14 .....	1.65		
No. 16 .....	1.65		

Balances for off-center windows are stocked for installation on the right hand jamb, looking out from the inside of the building.

When ordering two balances for a window, take the number corresponding to one-half the weight of each sash.

This roller is used on side of Sash opposite Balance. Single installation only.

This ACME feature makes it possible to use only one balance on most windows as the roller assures smooth up - and - down movement.

For Single Installation the Sash Balances may be installed on either side of window.
